

**PEOPLES SERVICES, INC. Selects **FOREVERLAMP** to Supply LED retrofit Lamps  
For New Fremont, OH Facility**

**PEOPLES SERVICES, INC.**, a third-party logistics company, was looking to upgrade the lighting in their food grade facility

located in Fremont Ohio. As part of the company's sustainability program, they were looking for an economic and energy efficient solution to replace their 400W metal halide (MH) bulbs. This research led PEOPLES' to select **Foreverlamp**'s simple plug and play LED PS-HO bulbs.

The PS-HO lamp consumes only 200W of energy to replace the existing 400W MH lamps, cutting energy consumption in half. PEOPLES not only reduced energy consumption, but according Jim Ehret, Procurement Manager, "(the **Foreverlamp** bulbs) improved the quality and brightness of the warehouse lighting."

To date PEOPLES has replaced a total of 288 MH lamps with the **Foreverlamp** LED PS-HO model allowing them to repurpose their existing MH ballast fixtures. This simple replacement procedure allowed PEOPLES to reduce the building's energy usage, improved the light quality, and at the same time reduce its lighting bill - a win for everyone.
